- Desktop and server installation packages available

Inquiry Basket(0)

- 1.The ESDMAN 001-6809 ESD Access Control System is designed for fast, frequent, and accurate testing of ESD personnel grounding items. Its unique design embeds an ESD tester, computer clock, touch screen display, IC / ID card reader or barcode scanner, Ethernet module etc. in o a compact stainless steel enclosure.
- 2.This system can be worked with tripod turnstile, swing gate, flap gate, electronic lock & air shower room. In addition, it could provide basic ESD testing management, stop operators entering EPA without ESD testing.
- 3.What's more, test results are electronically stored in the system and easily downloaded as attendance management, which has the function of distinguishing and setting up different attendance statement. It will automatically store 500,000 testing results while software is closed and PC is off-line.
- 4.It meets the requirements of the ANSI/ESD S20.20 & IEC 61340 in the USA and Europe.
